Read the following passage carefully, then answer the questions below:

Mind management is a way to control one's mind. To do this, we need to be cautious about our thinking process and also need a high level of understanding and thinking as well. Understanding is wisdom – 80 percent of people are knowledgeable, while 20 per cent are wise. Knowledgeable people take sides without reason. They feel sad seeing unhappy people but jealous when they see happy people. They work in the guidance of others' inspiration and take unnecessary responsibility which disturbs them.

A wise person does not stand for or against any idea without a clear reason. He works according to the situation and his ability. He looks at everything logically. To him, failure is an important step towards future success. Therefore, a wise person doesn't feel depressed whenever he fails. In addition, thinking is necessary for him to make mind management an easy task.

If we don't control or manage our mind, it is difficult to achieve success and peace. Doctors say every interest is first born in the mind as a seed. Then it continues to grow. Later it takes its real form which everybody can see. The interest that first appears in the mind remains weak for the first three minutes and **it** becomes strong within the next five minutes. All the negative things should be deleted within the first three minutes. If the negative things are not taken out, they would become stronger later and you can never throw them out. After taking control over the mind, we can control passion, interest and unrest. Mind management is essential for a peaceful, successful and healthy life.

The age of computers has encouraged us to be more ambitious but has prevented us from the pleasure of rest like falling asleep. In fact, busy schedule is a heavy load on the mind and causes stress. However, the joys that we lose can be regained by practising the power of thinking. Therefore, the power of thinking creates **tranquility**, simplifies life and cleans the mind. It helps control laziness, self-image and anger and builds confidence and patience. With the power of thinking, negative thoughts disappear, and a sense of happiness is achieved.
