7. Please make sure that we have **adequate** food and drink for twenty guests.

8. The Japanese and Korean people are **extremely** fond of eating rice and noodles.

B) Reading Comprehension (16 Marks)

Read the following passage, then answer the questions that follow.

Scientists who study rocks are called geologists. It is the dream of geologists around the world to find out something new about the past. Scientists were very surprised when this happened to a five-year-old girl in England. Daisy Morris was walking on a beach with her family. Suddenly, she saw some black bones sticking out of the sand. She knew it was a fossil and so she dug it out and showed her family.

Her family took the fossil to a geologist called Mr. Simpson. Scientists then studied it for five years. Then, in 2013, they told the world that Daisy's fossil was of a flying dinosaur. In fact, it was a flying dinosaur that no one knew it **existed** before, so this dinosaur did not have a name. As Daisy discovered the dinosaur, the scientists called it *Daisy Morris Flying Dinosaur*. Scientists think it is 250 million years old. Daisy's dinosaur is now in the National History Museum in London.

Mr. Simpson said, "I knew that I was looking at something very special. And I was right." He was very happy that Daisy found the dinosaur because it was going to be washed away into the sea and lost forever. All Daisy's family and friends are very proud of her. She has so many that her family says that her bedroom is like a museum. Daisy wants to be a geologist when she grows up.

A) From a, b, c and d, choose the best answer.

(6x 2= 12 Marks)

9. The best title for the passage is:

- a. Mr. Simpson's Family
