#### **Reading Comprehension (16 Marks)**

#### Read the following passage carefully, then answer the questions below:

16

Have you ever eaten something that you grew in your garden? Many people have not had the pleasure of this experience. Alice Waters changed all that for some students in California, USA. Alice worked with their school to create a gardening program. She believes there is a strong relationship between food, health, and the environment. She wanted to teach them that a healthy body and environment go **hand in hand**.

Alice's project took a lot of time and patience. She needed the help of teachers and students to turn a parking lot into a garden. In 1995, the first vegetables were planted in the school. Every year, new crops are added, and old crops are checked to ensure they are best suited for the school's needs.

Students have found that they look forward to spending time in the garden. They have learned how to plant, and they learned about the life cycles of various plants. Many students have discovered that they like the new types of fruits and vegetables, which **they** had never been willing to try before. Alice Waters dreams that one day there will be a garden in every school.
