- 7- This car is not.....more than KD 2000; how did you pay KD 3000 for it?
- 8- As an old man, my grandfather's teeth have become very.....to cold food.

**B-Reading Comprehension: (16 Marks)**

**Read the following text, and then answer the questions that follow:**

Like people, other living creatures can communicate. However, animal communication is sometimes sound communication and sometimes action communication.

A good example of action communication is the honeybee. Scientists have watched the activities of bees for a long time. One bee starts out from a beehive, the bees' home. The bee goes out to look for flowers. It finds flowers and then flies back to the hive. At the hive, the returning bee seems to move around in a dance. Other bees seem to watch. Then these bees fly out of the hive—straight to the same flowers. The first bee has somehow given information to the other bees. The bees communicated through actions.

Sound communication is more common among animals. Whales in the ocean seems to "sing" to one another. Scientists have listened to whale songs with underwater microphones. **They** know that each whale has his own song. Scientists can **recognize** some whales by their songs. So far, however, scientists do not understand what the whales are saying.

Some animals seem to want to talk to human beings. For example, dolphins in the ocean swim very close to people. They make high noisy little sounds to the people. Are they trying to talk? Animals are talking with one another. Perhaps someday we can learn their languages, and we can talk with them.

a) Choose the correct answer from a, b, c and d:

( 6 x 2 = 12 Marks)

9- The best **title** of the text could be:

- The Life of a Honeybee
- Animal Communication
- How to Swim with a Dolphin
- Strange Creatures in the Ocean

10- The meaning of the underlined word "**recognize**" in the 3<sup>rd</sup> paragraph is:

- identify
- change
- connect
- jump

11- The underlined word "**They**" in the 3<sup>rd</sup> paragraph refers to:

- songs
- microphones
- whales
- scientists

12- When a honeybee finds flowers, it:

- plays with other bees.
- stops and never flies again.
- flies back to the beehive.
- makes a lot of noise.

13- According to the text, all the following statements are **TRUE EXCEPT:**

- Scientists understand all the songs of the whales.
- Dolphins in the ocean can swim very close to people.
- Other living creatures can communicate like people.
- Scientists have watched the activities of bees for a long time.

14- The **purpose** of the writer in this text is to:

- tell the readers how honeybees build their beehives.
- give the readers information on how to swim in the ocean.
- entertain the readers with a funny story about sea creatures.
- inform the readers about the ways some animals communicate.
