B- Reading Comprehension (16 Marks)

- Read the following passage carefully, then answer the questions that follow:

16

Turtles are amazing animals with hard shells on their backs that protect them. These shells keep them safe from the danger of other animals that might want to eat them, and turtles can live in **different** places. Some live in the water, like sea turtles, and some live on land, like tortoises.

Sea turtles have flippers to help them swim, while land turtles have short legs for walking. Turtles are mostly slow movers, but they're very quiet and calm. They eat things like plants, insects, and small fish.

Turtles have lived on Earth for two hundred million years, which means they are very old animals! When a turtle is in danger, it can pull its head, legs, and tail inside its shell to hide. Baby turtles come out of eggs and are very small when **they** are born. Some turtles can live a very long time in the wild. Turtles are special animals. People love learning about them because they are unique and gentle.
