- Read the following passage carefully, then answer the questions that follow:

The Eiffel Tower is a famous landmark in Paris, France. It was finished in 1889 and is 324 meters tall. Gustave Eiffel designed it, and it took over two years to build. At first, some people in Paris didn't like how the tower looked and thought it was ugly, but it soon became a symbol of France and modern engineering. The tower is made of iron and weighs about 10,100 tons. To keep it from getting old, it's painted every seven years.

The Eiffel Tower has three levels. A visitor can use an elevator or climb the stairs to get to them. The first two levels have a restaurant and shops. The third level offers an amazing view of Paris. There, one can see its beautiful long streets.

The tower was originally built for the 1889 World's Fair to celebrate the 100th anniversary of the French Revolution. It was meant to be a temporary structure, but it became so popular that it stayed until now. Today, almost 7 million people visit it each year.

Besides being a tourist spot, the Eiffel Tower is also used for scientific research. Over the years, it has been used for experiments with radio and weather. The Eiffel Tower's beautiful design and history make it a beloved symbol of France and a remarkable example of human creativity.
