**B- Reading Comprehension (16 Marks)****A. Read the following passage carefully, then answer the questions that follow:**

16

Eagles are among the most powerful and admired birds in the world. Well-known for their sharp vision and strong wings, these majestic creatures have fascinated people for generations. Eagles **inhabit** almost every continent except Antarctica and typically choose tall mountains, cliffs, or large trees as nesting sites for their impressive homelands.

One of the most famous species is the bald eagle, found in North America, where it inhabits areas near lakes, rivers, and coastal regions. Despite its name, the bald eagle is not bald at all. Its head is covered with white feathers, which contrast beautifully with its dark brown body. It became a national symbol of strength and freedom in the United States in 1782.

Eagles have excellent eyesight—up to four times better than that of humans. This powerful vision allows them to see small animals like rabbits or fish from high above the ground. Once **they** spot their prey, they dive quickly and silently, using their sharp talons to catch it. Despite their strength, eagles are still endangered. Pollution, deforestation, and hunting once pushed many eagle species close to extinction. Conservation programs and strict legal protection have helped their numbers increase again.

Eagles teach us not only about the wild but also about survival and patience. They wait for the right moment to act and use their strengths wisely. Watching an eagle fly high in the sky can remind us to rise above our problems and see life from a higher view.
